PROFESSIONAL SUMMARY

An Information Technology graduate with hands-on full-stack development experience across React, Next.js, Tailwind CSS, and PHP. I build features across the frontend and backend, write clean and maintainable code, integrate REST APIs, and work with relational databases including MySQL. I thrive in fast-paced environments, take ownership of my work, ask the right questions, and am genuinely excited to grow by working on real production code alongside experienced engineers.

PROFESSIONAL EXPERIENCE

IT Intern (On-the-Job Training) | University of Northern Philippines - College of Medicine 2024 – 2025

- Built and maintained internal web interfaces for student record management, writing clean frontend and backend code following established patterns and best practices
- Diagnosed and fixed bugs across the stack, learning to troubleshoot problems efficiently and minimize downtime across department systems
- Documented technical processes and code decisions to support team knowledge sharing and onboarding

EDUCATION

Bachelor of Science in Information Technology | University of Northern Philippines 2021 – 2025

Tamag, Vigan City, Ilocos Sur

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, PHP, Dart, SQL

Frontend: React, Next.js, Tailwind CSS, Vue, Angular, HTML5, CSS3

Backend: REST API Integration, PHP backend, session management, authentication

Databases: MySQL, SQLite

Mobile: React Native, Flutter

Tools & Platforms: Git, GitHub, Vite, Expo

Core Competencies: Full-Stack Development, Debugging, Code Review, REST API Integration, Technical Documentation, Agile Development, Security Best Practices

PROJECTS

React Native Mobile Application | Owen — Smart Nutrition Tracker React Native · Next.js · Tailwind CSS · SQLite

github.com/unsatisfieDg/Owen

- Built a full-stack cross-platform app using React and Next.js patterns, Tailwind CSS styling, offline SQLite database of 9,000+ food items, BMR/TDEE calculations, and CSV data export
- Implemented a hybrid AI assistant running on-device with cloud fallback, integrating REST APIs and handling complex state across the full application lifecycle
- Wrote maintainable, well-structured code independently — covering component architecture, authentication, streak tracking, dark mode, and native animations

Full-Stack Web Application | Coffee Shop Reservation System Laravel · PHP · JavaScript · MySQL

github.com/unsatisfieDg/coffee-reservation

- Built a full-stack reservation platform using Laravel and PHP on the backend, with a responsive JavaScript frontend, MySQL relational database, and REST API communication between layers
- Implemented user authentication, real-time table booking, concurrent session management, bcrypt password hashing, and SQL injection prevention
- Participated in code reviews and wrote modular, clean code with clear separation of concerns — prioritizing maintainability and readability

TRAINING & CERTIFICATIONS

- **AWS Generative AI for Developers** — Amazon Web Services ID: 4JO1NP43I0XN
- **Generative AI for Software Development** — DeepLearning.AI ID: KFDK60RB3DZU
- **Emerging Technologies in IT** — UP Training and Development Center, UP Diliman June 5, 2024
- **AI and the Metaverse: Innovations and Applications** — Pasay, Metro Manila June 6, 2024
